

# StarChef.NET Release Note

21<sup>st</sup> November 2011

## Enhancements

Overview	Description
'Publish To' tab for Ingredient and Recipe Summary Popup Windows	<p>The popup window displayed when clicking on a recipe ingredient or menu item now includes a 'Published To' tab. This new tab displays a list of all sets that the ingredient or recipe is published to.</p> <p>This feature is only available to users who have the 'Ingredients &gt; View published set information' permissions enabled for the active user group.</p>
Distributor and Supplier Information on Ingredient Summary Popup Window	<p>The popup window displayed when clicking on a recipe ingredient now displays the name and code values for both the ingredient supplier and distributor.</p>
Recipe Ingredient Summary Tooltip	<p>A tooltip showing ingredient details has been added to recipe ingredients. The tooltip is displayed when hovering over an ingredient name in the recipe ingredients list or hovering over a value in the list of 'Available Ingredients' displayed on the edit recipe ingredients dialog.</p> <p>The following ingredient values are displayed on the tooltip (if entered):</p> <ul style="list-style-type: none"><li>• Supplier Name</li><li>• Supplier Code</li><li>• External Code</li><li>• Internal Code</li></ul>
Duplicate Ingredient Supplier and Distributor Codes	<p>It is now possible to enter duplicate distributor codes and/or supplier codes for ingredients.</p> <p>This feature is not available by default on each database, only on request.</p>
Login Page Changes	<p>Minor user interface changes have been made to the home and login pages.</p> <p>Note that mobile login is only available to users of the <a href="#">StarChef Light</a> product.</p>
