

# StarChef.NET Release Note

8<sup>th</sup> February 2012

## Enhancements

Overview	Description
Advanced Search for recipe ingredients tab	Advanced search is now available when specifying which ingredients / sub-recipes to add to a recipe.
Advanced Search for reports	Advanced search is now available when specifying which individual items to include in a report.
Default Recipe Intolerance Calculation Method	When a recipe is created, the default intolerance calculation method is set to 'auto-calculate' by default. Previously the default recipe intolerance calculation method was 'manual'.
Ingredient hover-over information	When hovering over an ingredient in the search list, supplier name and code information is now displayed if available.
